

Python Challenge - Dictionary Comprehension

Given a string show how many vowels and consonants exists in the string.

Example of input:

```
In [ ]: meow
```

Example of output:

```
In [ ]: {  
    "string": "meow",  
    "vowels": [  
        "e",  
        "o"  
    ],  
    "consonants": [  
        "w",  
        "m"  
    ],  
    "n_letters": 4,  
    "n_vowels": 2,  
    "n_consonants": 2  
}
```

```
In [ ]:
```
